Chairman's Statement

Dear Shareholders,

It is my privilege to welcome you all to the 51st Annual General Meeting of your Company. Your company has maintained all-round good performance and growth, and is today one of the leading public sector trading companies in the country.

During the year 2013-14, the company has come out of a difficult phase and has achieved an improvement in its performance even though the national economic growth rate has been among the lowest during last 25 years. The global economic and trading environment has been very challenging and uncertain due to factors such as high interest rates, inflation, demand slowdown, weak investment climate, political instability, geo-political tensions, and overall economic slowdown in Europe and other parts of the world. Global GDP grew at 3.0% in 2013 as against 3.1% in 2012 and is expected to grow at 3.5% in 2014. However, with stable government in place now, the structural bottlenecks are expected to be overcome, and the investor sentiment is likely to improve with a consequent positive impact on the economy.

Performance

Your Company has successfully withstood the challenging economic environment and has registered a net profit of ₹ 18.64 crores as against a loss of ₹ 70.62 crores in 2012-13. Precious Metal imports were 4.4% of India's gold imports, and the Coal imports showed an improvement during the year.

Business Diversification Initiatives

The dynamics of global trade and the opportunities provided by the multilateral trading platform necessitate a continuous realignment of our international trading strategies and priorities. Going beyond the traditional role of being a trade organizer and facilitator, your company has undertaken several value multiplier initiatives in the form of joint ventures with leading private sector players for enhancing the company's future sustainability.

Your Company's steel plant Neelachal Ispat Nigam Limited (NINL), promoted jointly with Govt. of Orissa, was granted iron ore mining lease with estimated reserves of 110 million tones, which are at advanced stage of statutory environmental clearances. The Phase-2 of NINL has now commenced production of steel billets and is under stabilization. The medallion manufacturing unit MMTC-PAMP India Private Limited (MPIPL), has been accredited as "Good Delivery" Refinery for Silver and Gold from LBMA this year, and it has also given a dividend of 30% to its shareholders for its excellent performance. The SPV promoted by your company in association with IL&FS, is setting up an International Cargo hub at Haldia and a Free Trade Warehousing Zone at Kandla, for which 200 acres and 75 acres of land respectively have been allotted to MMTC.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT 2013-14

Overview of global trade and developments

The IMF World Economic Outlook(WEO), released in January 2014, highlights that global economic activity has picked up during the second half of 2013 with expectation of further improvement in 2014-15. The outlook has projected world growth at 3.7% in 2014 and by 3.9% in 2015. It also mentions that recovery in global economy will be supported by improvement in the advanced economies as final demand in advanced economies has expanded with higher inventory demand. On the other hand financial condition in emerging markets has remained tight with equity prices not fully recovered and some currencies under pressure after US tapering announcement in May 2013.

The growth in EMDEs is expected to increase to 5.1% in 2014 and 5.4% for 2015. China is projected to grow at the rate of 7.5% and 7.3% for 2014 and 2015. The growth in China rebounded in second half of 2013 due to improvement in investment. Growth in India picked up after a favorable monsoon and export growth and is expected to firm further on stronger structural policies.

WTO ranked India as the 19th largest merchandise exporter in the world, with a share of 1.6% of the global trade and the 10th largest importer with a share of 2.6% of global imports in 2012(STO's International Trade Statistics, 2013). In Commercial Services Trade, India was the 6th largest exporter with 3.4% share of world market and 7th largest importer with 3% share of world market.

Overview of developments in India during 2013-14

India's current account deficit has improved dramatically from 4.7% of GDP in 2012-13 to 1% in 2013-14. India's foreign exchange reserves increased from US$ 292 billion at the end of March 2013 to US$ 304.2 billion at the end of March, 2014. India's economic growth remained subdued at 4.7% in 2013-14 and at 4.6% in the fourth quarter of the financial year, mainly due to a decline in manufacturing and mining output. The country's economy, or gross domestic product(GDP), had expanded at 4.5% in 2012-13, the slowest pace in the past decade. Growth in 2013-14 was less than the Central Statistics Office's advance estimates of 4.9%. The economy expanded 4.4% in the fourth quarter. INR fluctuated from ₹ 53.7355 to ₹ 68.3611 per US$ during FY 2013-14. The expectation of a new Government to revive the economy would create positive sentiments in the market which bode well for the economy.

Business Groupwise Review for 2013-14

Minerals

Continuation of the ban on Iron ore mining and export from Bellary Hospet Sector, regulation of export from Eastern Sector, high railway freight for exports which is currently over three times that of domestic movement of ore, increase in domestic demand of ore and higher export duty etc. had an impact on the quantum of Indian Iron ore exports during 2013-14, as compared to other international suppliers i.e. Australia and Brazil. The capacity of domestic Steel production has also expanded, resulting in lesser availability of Chrome ore, Chrome Concentrate and Manganese Ore for exports. With the introduction of 30% ad valorem export duty on Chrome ore and Chrome concentrate, the exports of these items has further declined in FY 2013-14. Despite this and the stiff competition at national and international levels, MMTC continued to maintain its position as a prominent exporter of minerals during the year under review.

In spite of above constraints, Minerals group of your company contributed a turnover of ₹ 23,204.5 million during the year 2013-14, which includes exports valued at ₹ 20,372.7 million, imports amounting to ₹ 50.7 million and domestic trade of ₹ 2,781.1 million. The export made by the group includes Iron Ore valued at ₹ 16,702.6 million, Chrome Ore/ Concentrate valued at ₹ 3525.70 million and Manganese Ore valued at ₹ 144.40 million. The group imported Manganese ore valued at ₹ 50.7 million from South Africa. The domestic trade of this group includes Iron Ore valued at ₹ 2,511.9 million, Dolomite valued at ₹ 89.8 million & Limestone valued at ₹ 65.9 million.

Export of iron ore continued during the current year under Long Term Agreements with Japanese Steel Mills and Pohang Iron & Steel Company(POSCO), South Korea valid upto FY 2014-15.

The increase in Steel production/consumption in India would result in further demand of Iron ore from domestic industry and may also affect the availability of Iron ore for export in future.

Precious Metals, Gems & Jewellery

Your company enjoys the position of market leader in the Indian bullion trade, having flexibility to operate from various centers spread all over the country offering novel product services, besides maintaining enduring relationship. Despite high volatility in prices of bullion as well as Indian rupee US dollar exchange rates, Precious Metals Group of your Company contributed a turnover of ₹ 91,731.4 million during 2013-14. This performance was realized through diversified activities, which include bullion import of gold and silver at ₹ 84,115.9 million.

The precious metals group of your company is continuously working on improving service to customers and now has 4.4% share of India's gold trade during 2013-14. The Precious Metals group is focusing on improving sales of value-added products, viz. Jewellery, medallions and silverware. The company's joint venture MPIPL which started operation in 2012, achieved a profit of ₹ 737.4 million during 2013-14. During the last quarter of FY 2013-14, the Reserve Bank of India(RBI) enacted a series of measures to curb gold imports for domestic use to reduce the gap of India's increasing current account deficit. In the recent past on one side Government of India compelled nominated agencies to restrict the gold import by withdrawing the consignment model of gold trading, and on other side customs duty on import of gold has been kept at 10%, the highest during recent years. MMTC's quantity of import also has been restricted due to 14 February 2014 RBI circular according to which maximum limit of gold import is either the first or second lot gold import done by any MMTC centre. It is expected that Gold Consumption would go up during 2014-15 as the investment demand is slowly returning and jewellery demand continues to remain stable in India.

The demand of bullion is expected to go up in 2014-15 with positive sentiments of new formation of Government and geopolitical factors, however Gold and silver price, exchange rate will be under stress due to volatility. Indian Government may continue its stance to curb gold import by various means to curtail Current Account Deficit. Retail boom in jewellery is likely to increase in the current year as more disposable income is available in the hands of consumer and the demographic profile of India. The company has to innovate by selling value added products and service in the bullion sector.

India has emerged as the largest hub for diamond processing in the world; access to rough diamond is a critical need to support SMEs ad maintain our competitive position globally. MMTC can leverage this opportunity to become major importer for catering to diamond processing industry in India.

Metals and Industrial Raw Material

The Metals group of your Company contributed ₹ 15191.2 million to MMTC's turnover during 2013-14. The contribution of the group comprised of export of Pig iron worth ₹ 10992.3 millions produced by NINL – a MMTC promoted Iron & steel plant, export of slag amounting to ₹ 17.7 million, imports of Non-Ferrous Metals worth ₹ 1779.1 million & Industrial Raw Materials worth ₹ 66.7 millions and domestic sales of ₹ 2335.4 millions

While Indigenous producers dominate the domestic market of copper, zinc, aluminum etc., the International Markets for NFM continue to be influenced by less demand due to global financial turmoil, especially the sovereign debt related issues in the European Union and slowdown in major economies of the world, adversely affected NFM business. The other factors, which have adversely affected NFM business during 2013-14 are increase in production by domestic manufacturers of Aluminium, Copper, Lead, and Zinc, that has shrunk the market for imported NFM, overall recessionary conditions in the industry during FY 2013-14, market becoming very competitive, strict adherence to risk minimization measures by MMTC have led some customers to switch suppliers or resort to direct imports. Future strategies include exploring the possibility of selling NFM from FTWZs, deploying proper manpower and training for marketing of NFM products both at CO and RO level, expansion into minor metal and ferro alloy markets, diversifying sources of supply and resorting to hedging in a commodity exchange.

Agro Products

The Agro products group of the company achieved a turnover of ₹ 24696.8 millions during 2013-14, which includes exports of wheat valuing ₹ 7539.4 million and import of edible oils worth ₹ 12120.6 millions, Pulses/Dunpeas amounting to ₹ 18.7 million besides domestic trading including trade on the SPOT Commodity Exchange of Agro products.

During the year MMTC successfully exported wheat to buyers in South Korea, Bangladesh, Philippines, Africa etc. Imports of edible oils were made primarily from Malaysia and Indonesia, for meeting the PDS requirements of State Governments and also for private industry. Supplies of Edible Oil were also organized at request of State Governments for distribution through PDS.

The agro trade primarily depends on various factors like Government policies, vagaries of the climate, international market conditions, Rupee-US$ exchange parity, etc. Govt. policies are primarily aimed at control of food inflation, price stability in the domestic market etc. While the depreciating rupee made exports viable, imports became costlier. The group contributed substantially to the profitability of the company in addition to discharging its obligations as per Government directives. Non-payment of subsidies in time by Government of India continues to be a problem area for the company. With the likely introduction of Food Security Bill, MMTC is fully geared to discharge its obligations for import of food as and when directed by Government. The Agro Group of the company has also devised plans and strategies to meet the challenges in the Agro trade.

Fertilizers and Chemicals

The Fertilizer and Chemicals group contributed a turnover of ₹ 39871.8 million. The topline has been achieved from business in UREA, MOP, Sulphur, Technical Grade Urea, Complex Fertilizer and Ammonium Sulphate.

During the year, import on behalf of the Government of India is about 1.7 million tonnes of urea valued at about ₹ 34463.7 million. MMTC continued the export of Fertilizers to Nepal as activity by exporting about 0.07 million tonnes valued at about ₹ 2348.3 million. During the year, MMTC imported Fertilizers (Non Canalised) valued at about ₹ 3011 million.

The Company also undertakes domestic trade of ammonium sulphate, which is a byproduct of operations at the Iron and Steel plant (NINL) promoted by MMTC in Joint Venture with Government of Orissa. This contributed to a turn-over of about ₹ 49 million.

Fertilizer industry in India has been passing through a difficult phase in recent years. The year under review was a difficult period for the fertilizer industry in general in view of huge disparity in the import price of various fertilizers remaining substantially higher as compared to the MRP and subsidy available domestically. This mis-match resulted in huge demand destruction in the case of all fertilizers except urea.

India is still dependent on import of fertilizers despite the efforts being made by the Government to enhance the domestic production of fertilizers. This is despite the fact that production of urea has improved domestically. Production of several fertilizers in the country is dependent on the cost and availability of several raw materials like Ammonia, Rock Phosphate, Phosphoric Acid, Gas, etc. This apart, India is dependent totally on overseas suppliers for its requirement of MOP. With the introduction of Nutrient Based Subsidy Scheme by the Government of India, several complex fertilizers have been brought under the subsidy regime. This is expected to offer opportunity for the Company for which efforts are being made. However, the agricultural sector continues to remain dependent on monsoon and the changes in the Government policy on fertilizer.

On the global front, the fertilizer industry is characterized by consolidation on the supply side. The Indian industry on the other hand is dependent on government subsidy regime and guidelines issued from time to time for imports, distribution, and sale. The Fertilizer Control Order of 1985 with guidelines issued by Department of Fertilizer, Government of India , from time to time provides direction to all the players in the Indian fertilizer industry. Urea remains the only canalized product for import and all other fertilizers are under OGL. As against the policy followed in the past, wherein Maximum Retail Price was frozen and subsidy was kept floating in line with increase-decrease in cost of production or cost of import, with the introduction of Nutrient Based Subsidy Scheme, there has been a major shift to keep subsidy frozen and MRP floating depending on market conditions. The idea was to make fertilizer affordable to the farmers, optimum application of all fertilizer nutrients to the soil thus making soil more fertile and reduce the subsidy outgo for the Government.

Fertilizer trade depends on the monsoon and the Government policy. The global economy continues to face challenges but appears to be on the recovery path. With food inflation being felt by countries across the globe including India, the focus specially for the developing nations would be on increasing productivity in agriculture. However, the global supply position of all the major fertilizers is expected to remain comfortable with new addition in capacities mainly in Urea, DAP and MOP.

Efforts are continuously being made to increase the volume of business in the existing product line and aggressively exploring new fertilizer products for trading. The action plan for enhancing business in 2014-15 include increase in market share in MOP by retaining the existing customers and adding new customers, request more allocations of Urea from DOF during 2014-15, increasing imports of Technical Grade Urea by expanding the customer base, thereby boosting profits, focus on NPK for increase in trade volume and profit, increased exports to Nepal and diversifying supplier base as well as customer base.

Coal & Hydrocarbons

The Coal & Hydrocarbons group contributed a turnover of ₹ 55963.5 million to the turnover recorded by your company, comprising of import of steam coal ₹ 41536.7 million and Coking Coal amounting to ₹ 9971.2 million. Domestic trade of Coal and Hydrocarbons group consisted of ₹ 4455.6 million, consisted of ₹ 1951.2 million of steam coal, ₹ 562.6 million of Crude Tar, ₹ 2.1 million of CPC and ₹ 1939.7 million of LAM Coke. The group continues to improve its thriving coal business by expanding its sourcing network, cost effective shipping and appropriate delivery structure to the major power utilities in India including NTPC, DVC, TANGEDCO, MAHAGENCO, APGENCO, NSPCL, APCPL. MMTC has been sourcing imported coal mainly from Indonesia and to some extent from South Africa and catered to various Central and State Utilities and Private Players in India. MMTC has started its coal operations from various emergent ports in India in order to achieve logistics viability and to be a cost effective supplier during the year.

With the result, MMTC has increased its presence in Coal segment throughout the Country. After consolidating the position in the Power Sector, MMTC has poised to tap the emerging opportunities by foraying in a larger way into the sectors such as cement and sponge iron units.

India's coal imports touched record high to 170 million tonnes in 2013-14 vis-a-vis 135 million tonnes in 2012-13 and are set to grow further owing to mismatch in demand and indigenous coal supply. More than half of the country's 243.0 Gigawatt installed capacity is through coal fired plants. In this scenario India will be wholly reliant on imported coal for incremental coal fired power generation capacity in the future. Ministry of Coal and Planning Commission have also envisaged that India would need to import 185 Million Tons of Coal by 2017 in order to meet the increasing gap between estimated demand and supply to achieve its energy targets. India plans to add generation capacity of 88.54 Gigawatt in the five years to end-March 2017, compared with almost 55 Gigawatt in the previous five-year period. With domestic production unable to meet the rapidly growing demand of non coking coal for power sector, steel, fertilizer and other heavy industries, the existence of big supply gap induces the country to depend upon sizable imports. Further the increase in demand of steam coal is likely to increase considerably in future with many new coal fired generation plants being underway and shall open up new opportunities for this segment of your company. The coal & hydrocarbon group of your company shall be tapping these emerging opportunities to import and serve the increased demand of coal & coke to power, steel, fertilizer, chemical, cement & sponge Iron units in future. The group also plans to aggressive follow up with suppliers for allocating more coking coal and intends to add LTA suppliers for wider supply base.

Mica

As reported in earlier years, the changed market requirement and technological developments in Mica processing technologies globally led to activities at Mica Division coming to a halt since 2002-03. Measures are being taken to dispose of obsolete Plant & Machinery located at Mica Division establishment at Abrakhnagar, Kodarma District, Jharkhand.

Others

The other products contributed ₹ 87.1 million to the turnover of the Company, which included domestic trade worth ₹ 87.1 million by way of sale of power generated at the 15 MW wind power farms commissioned in March 2007 in Karnataka.

During the year 2014-15, the company shall continue availing opportunities emerging in new markets/ products for generating additional business revenues for the Company.

Cautionary Statement

Statements in the Management Discussions and Analysis describing the Company's projections, estimates, and expectations may be "forward looking statements" within the meaning of applicable laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include economic conditions affecting demand/supply and price conditions in the domestic and overseas markets in which the Company operates, changes in Government regulations/policies, tax laws, other statutes and other incidental factors.

COMMENTS OF THE COMPTROLLER AND AUDITOR GENERAL OF INDIA UNDER SECTION 619(4) OF THE COMPANIES ACT, 1956, ON THE ACCOUNTS OF MMTC LIMITED FOR THE YEAR ENDED 31 MARCH 2014.

The preparation of financial statements of **MMTC Limited** for the year ended 31 March 2014 in accordance with the financial reporting framework prescribed under the Companies Act, 1956, is the responsibility of the management of the Company. The Statutory Auditors appointed by the Comptroller and Auditor General of India under Section 619(2) of the Companies Act, 1956, are responsible for expressing opinion on these financial statements under Section 227 of the Companies Act, 1956 based on independent audit in accordance with the Standards on Auditing prescribed by their professional body, the Institute of Chartered Accountants of India. This is stated to have been done by them vide their Audit Report dated 29 May 2014.

I, on behalf of the Comptroller and Auditor General of India, have conducted a supplementary audit under Section 619(3)(b) of the Companies Act, 1956 of the financial statements of **MMTC Limited** for the year ended 31 March 2014. This supplementary audit has been carried out independently without access to the working papers of the Statutory Auditors and is limited primarily to inquiries of the Statutory Auditors and the company personnel and a selective examination of some of the accounting records. Based on my supplementary audit, I would like to highlight the following significant matters under section 619(4) of the Companies Act, 1956 which has come to my attention and which in my view are necessary for enabling a better understanding of the financial statements and the related Audit Report.

Liabilities Written Back - ₹57.21 crore

This includes an amount of ₹25.70 crore written back on the basis of orders of Customs, Excise & Service Tax Appellate Tribunal passed in December 2011 in favour of the Company. This order inadvertently escaped attention of the Management while finalizing Annual Accounts for the year 2011-12 and 2012-13. This tantamount to an error or omission in earlier years and thus the liability should have been written back through prior period adjustments. This is not in consonance with the Accounting Standard-5, specified in the Companies (Accounting Standards) Rules, 2006, which requires separate disclosure of nature and amount of prior period items in the Statement of Profit and Loss, in a manner that their impact on the current profit or loss can be perceived.

(1) Non-Current Assets

Non-Current Investments (Note No. 6.2) - ₹445.66 crore

The above head includes an amount of ₹33.80 crore being 26% equity investment in joint venture SICAL Iron Ore Terminal Limited (SIOTL). Though the project of the construction and operation of iron ore terminal at Ennore Port was completed in November 2010 but the commercial operations could not commence due to restrictions on mining, transportation and export of iron ore. The SIOTL, in its books has not capitalized the above project though it was ready for use since November 2010. As a result all administrative costs and financing costs after November 2010 are still being booked to Capital Works in Progress (CWIP) and also no depreciation is being provided for. Had these costs been transferred to the Profit & Loss Account the net worth of the SIOTL would have completely eroded by 2013-14.

In view of the above, we are unable to certify correctness of including an amount of ₹33.80 crore as Non-Current Investments.

(2) Current Assets

Short Term Loans and Advances (Note No. 7.5) - ₹687.12 crore

The above head includes an amount of ₹19.29 crore (including ₹2.74 crore deducted towards interest on excess payment made by Government of India - GOI) being the claims recoverable on account of import of pulses under 15% scheme of GOI. As these claims have been disallowed by the Ministry of Consumer Affairs, the same should have been provided for in the books of accounts. Non-creation of provision against these claims has resulted in overstatement of short term loans and advances and profits by ₹19.29 crore.

COMMENTS OF C&AG UNDER SECTION 619 (4) OF COMPANIES ACT, 1956 AND MANAGEMENT'S REPLY ON THE ACCOUNTS FOR 2013-14

COMMENTS OF C&AG	MANAGEMENT'S REPLY
Comment on Profitability **Statement of Profit and Loss** **Income** **Other Income (Note No.9)** **Other Non-operating Income** **Liabilities Written Back - ₹57.21 crore** This includes an amount of ₹25.70 crore written back on the basis of orders of Customs, Excise & Service Tax Appellate Tribunal passed in December 2011 in favour of the Company. This tantamount to an error or omission in earlier years and thus the liability should have been written back through prior period adjustments. As per practice, all liabilities / provisions are reviewed by the company every year. On review during the current financial year it was found that the liability of ₹25.70 crore need not be continued in view of the orders of Customs, Excise & Service Tax Appellate Tribunal and hence a decision was taken by the management to write back the said liability during the year and was accordingly credited to 'Liabilities Written Back A/c' in accordance with normal accounting practice followed for such transaction.
Comment on Financial Position **Balance Sheet** **Assets** **1) Non-current Assets** **Non-Current Investments (Note No. 6.2) - ₹445.66 crore** The above head includes an amount of ₹33.80 crore being 26% equity investment in joint venture SICAL Iron Ore Terminal Limited (SIOTL). Had these costs been transferred to the Profit & Loss Account the net worth of the SIOTL would have completely eroded by 2013-14.	1) The Iron Ore Terminal could not be commissioned by SIOTL for want of completion of the project as in the meantime Hon'ble Supreme Court imposed restrictions on mining, transportation and export of iron ore which necessitated the project to be modified for some alternative use. SIOTL has since decided to convert the project into a terminal for handling of coal imports for which approval of Ministry of Shipping and Surface Transport has been sought which is awaited. On receipt of approval, necessary modification in the project will be carried out before commissioning the project. Keeping in view the substantial investment made by the JV company in the project, a positive response is expected from the Govt.

In view of the above, we are unable to certify correctness of including an amount of ₹33.80 crore as Non-Current investments.	Since, the company's investment as 26% equity in the JV company is for long term and the project is expected to be fully viable, the value of equity investment has been shown at cost in accordance with the provisions of AS-13. Accordingly, the investment of ₹33.80 crore being 26% equity investment in the joint venture has been included in the non-current investments.
2) Current Assets **Short Term Loans and Advances (Note no. 7.5) - ₹687.12 crore** The above head includes an amount of ₹19.29 crore (including ₹2.74 crore deducted towards interest on excess payment made by Government of India - GOI) being the claims recoverable on account of import of pulses under 15% scheme of GOI. As these claims have been disallowed by the Ministry of Consumer Affairs, the same should have been provided for in the books of accounts. Non-creation of provision against these claims has resulted in overstatement of short term loans and advances and profits by ₹19.29 crore.	2) Govt. of India, Ministry of Consumer Affairs had advised to settle all claims relating to subsidy on import of pulses latest by 31st March, 2013 on grounds of non-availability of budget thereafter. The existing claim of ₹19.29 crore was lodged with the Government before 31st March, 2013 which remained unsettled. Out of ₹19.29 crore, ₹16.55 crore relates to the subsidy due to the company in accordance with the 15% subsidy scheme for import of pulses and remaining ₹2.74 crore relates to unjustified deductions made towards interest. The matter has been taken up with Ministry of Commerce for taking up suitably with Ministry of Consumer Affairs. Accordingly, it was felt pre-mature to make provision or withdrawing the claim at this stage.

MANAGEMENT'S REPLY TO AUDITORS OBSERVATIONS IN THE AUDIT REPORT ON ANNUAL ACCOUNTS FOR 2013-14

	AUDITORS' OBSERVATION	MANAGEMENT'S REPLY
1.	**Qualified Opinion**	
	a. Company has not followed its policy regarding writing off of debts / advances / claims as there are various debts / advances / claims which are outstanding for a long period and where company itself has made 100% provision against these debts / advances / claims considering the uncertainty of realization / un-realisability of these debts / advances / claims. Consequential effect of the same is not ascertainable.	As per Accounting Policy of the Company, Debts /advances /claims are to be written off when unrealisability is almost established. The company has been making effort to write off some of the old dues. However, it is taking time for want of necessary clearances from Internal Audit, Law, Vigilance etc. before seeking approval of competent authority.
	b. Our observation in respect of the inadequacies in the internal control systems, as stated in para (iv) of Annexure to the main audit report, which may have consequential effect on the accounts for the year. (Effect not ascertainable).	As per details given below.
	Para (iv) of annexure to the main audit report	
	As regards the purchases and sales of goods, inventories and stocks that are dealt with by the Company including domestic bullion transactions it needs further strengthening in such a manner so as to avoid delay in updation in ERP system viz-a-viz actual date of transaction and similarly, manual generation of invoices could be avoided.	The company has reiterated instructions to update the books of accounts on daily basis and it is being monitored. Manual generation of invoices is discontinued except in cases where the existing ERP system does not support.
	Further, the internal control mechanism needs to be strengthened, besides the areas mentioned hereinbefore, in the following areas:	
	a. Periodic quantitative reconciliation of goods traded by the company (particularly bullion / retail trade) between the ERP and other standalone inventory system (RMS).	Reconciliation of purchases, sales and closing stock is carried out periodically between ERP records and other records like manual stock registers, VAT and CST returns etc. Physical verification of the stocks is carried out once in a year. The data relating to retail sales of Precious Metals like gold medallions, silver medallions and Sanchi silver wares are maintained in a separate standalone system, viz. Retail Management System (RMS). The summary of daily transactions from RMS is posted in ERP system on daily basis. The reconciliation is carried out periodically between RMS and ERP system.
	b. Risk assessment and Risk management needs to be strengthened / revamped further as it is noticed that due to certain acts of omission and commission, company had to make heavy provisions against debtors / recoverable / losses.	Taking into account the omissions and commissions in the recent past, the company has framed a comprehensive Risk Management Policy and the same, after approval by Board of Directors, has been circulated to all concerned.

	c. Periodic reconciliation in-respect of sales and purchases, input / output VAT as per financial records vis-à-vis sales, purchases, input / output VAT as per VAT returns.	During the year, instructions have been reiterated to reconcile the financial records with VAT and CST returns and Internal Auditors have been advised to check the same from time to time to ensure compliance.
2.	**Emphasis of Matter**	
	a. Subsequent to the default in payment obligation of National Spot Exchange Limited (NSEL) and consequential filing of legal suit in Mumbai High Court against NSEL and others and filing of criminal complaint with Economic Offences Wing (EOW), Delhi Police which has since been transferred to CBI, Mumbai, company has made provision of INR 2104.42 million (P.Y. Nil) against total recoverable amount of INR 2106.38 million as on 31st March, 2014 after adjusting INR 1.96 million realized up to 15th May, 2014. (Refer note no. 17 (iii)).	NSEL defaulted in their obligations to 13000 investors involving an amount of ₹ 5600 crores. All the genuine members trading on the exchange platform believed that NSEL, in terms of the Government exemptions granted for spot exchange, had commodities as underlying assets to secure the transactions. NSEL is a premeditated fraud perpetuated by the exchange in the commodity market on innocent members. MMTC has filed legal suit in High Court of Bombay against NSEL and 31 other defendants for recovery of its dues. Criminal complaint has also been filed by MMTC with Economic Offences Wing, Delhi Police which was transferred to CBI Mumbai. The case is under investigation by CBI. EOW, Mumbai has also investigated the case, arrested 11 persons and filed charge sheets in the designated court. NSEL is also under investigation by Enforcement Directorate, Income Tax Department, Ministry of Corporate Affairs and regulators like FMC. EOW, Mumbai has attached properties of defaulters valuing ₹ 5,100 crore approx. under MPID Act and MPID court has permitted auction of the properties. MMTC, along with other affected parties, is hopeful of realizing its dues through liquidation of properties attached under MPID Act.
	b. The company provides benefit in respect of post retirement medical benefit (PRMB) to its employees. The Actuarial liability for the financial year 2013-14 aggregating to INR 1368.32 million has been provided for (Refer to Note No. 23(g)). The company has neither earmarked its investment nor has created any corpus for this purpose.	The liability of ₹ 1368.32 million created as at 31st March 2014 on the basis of actuarial valuation is required to be allocated between the employees retired prior to 01.01.2007 and others. Necessary action for creating corpus and investing the fund will be taken in due course after bifurcation of the corpus.
	c. Balances under Sundry Debtors / Claims Recoverable / Loans & Advances / Sundry Creditors / Other Liabilities in many cases have not been confirmed and consequent reconciliation / adjustments, if any, required upon such confirmation are not ascertainable. (Refer note no. 35)	Letters are issued to parties seeking confirmation of balances outstanding in the books of MMTC to confirm the balances. It is also mentioned that in case no communication is received before stipulated date, the balance indicated shall be treated as confirmed. However, the parties generally do not send specific confirmation. Regional Offices have not reported receipt of adverse communication.
	d. The RMS software is not reflecting correct inventory of Sanchi items due to the problems in the package in some regional offices. Manual record of inventory of Sanchi items is also not maintained.	Instructions have been issued to maintain Manual Stock Register besides maintaining records in ERP and RMS system. In the meantime, the issues in RMS system are being sorted out.

	e. Non-provision of liability, if any, in case of extension of time / waiver / write off of GR-1 forms (Refer note no. 21).	This relates to GRs pending since 1991-92. Liability, if any will be provided as and when any demand is raised and settled by the company. At present the liability, if any, on this account is unascertainable.
	Annexure to Independent Auditor's Report	
	Internal Audit	
	The company has of late brought out a detailed Internal audit manual and has initiated steps to strengthen the internal audit system. However, in our opinion, the internal audit functions carried out by external Internal Auditors and Internal Audit Department needs further improvement in terms of quality and scope so as to make it fully commensurate with the size and the nature of its business.	The frequency of audit has been increased from half yearly to quarterly and the audit is done by Professional Internal Auditors. Audit is as per the Audit Programme which is very wide in its scope. To coordinate with the Professional Internal Auditors and also to check the financial transactions on day to day basis, all Regional Offices have been strengthened by posting one officer in the Internal Audit Department of the RO (Concurrent Auditors). Concurrent Auditors are reporting on a fortnightly basis. The reports of Professional Internal Auditors and Concurrent Auditors are properly dealt with for appropriate corrective action. During the year three days training was arranged on various issues of relevance for the Internal Audit Officials. Such training programmes shall also be arranged at regular intervals in future as well. The scope of Internal Audit is regularly reviewed in consultation with the Professional Internal Auditors / Statutory Auditors. A team of senior officials of MMTC is also nominated to conduct **"Special Bullion Audit"** on regular basis. The reports are received and suitable corrective action is suggested. Internal Audit Manual has already been circulated to all the Professional Internal Auditors for conducting audit as per the Manual. There has been improvement in the Internal Audit and efforts are continuing for further improvements.
	Fraud	
	National Spot Exchange Limited (NSEL) has defaulted in its payment obligations amounting to INR 2104.42 million which were paid by the company for trade done through NSEL against which goods were neither in the custody of NSEL nor available with the seller / borrower. The company has filed legal suit in Mumbai High Court against NSEL and others and has also filed criminal complaint with Economic Offences Wing (EOW), Delhi Police which has since been transferred to CBI Mumbai and the matter is under further investigation.	Refer reply 2(a) above.

MMTC TRANSNATIONAL PTE LTD

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2014

These notes form an integral part of and should be read in conjunction with the accompanying financial statements.

1. General information

The Company is incorporated and domiciled in Singapore. The address of its registered office is 20 Cecil Street, #14-02/03/04 Equity Plaza, Singapore 049705.

The principal activities of the Company are trading in minerals, metals, fertilizers, agricultural products, coal, gold and hydrocarbon products, jewellery and other commodities.

2. Significant accounting policies

2.1 Basis of preparation

The financial statements have been prepared in accordance with Singapore Financial Reporting Standards ("FRS"). The financial statements have been prepared under the historical cost convention, except as disclosed in the accounting policies below.

The preparation of these financial statements in conformity with FRS requires management to exercise its judgement in the process of applying the Company's accounting policies. It also requires the use of certain critical accounting estimates and assumptions. The management has assessed that there are no estimates or judgements used that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Interpretations and amendments to published standards effective in 2013

On 1 April 2013, the Company adopted the new or amended FRS and interpretation to FRS ("INT FRS") that are mandatory for application from that date. Changes to the Company's accounting policies have been made as required, in accordance with the relevant transitional provisions in the respective FRS and INT FRS.

The adoption of these new or amended FRS and INT FRS did not result in substantial changes to the Company's accounting policies and had no material effect on the amounts reported for the current or prior financial years.

Consolidated financial statements are not prepared as the Company is a wholly owned subsidiary of MMTC Limited, incorporated in India, which produces consolidated financial statements for public use. The registered office address of MMTC Limited is Core – 1, Scope Complex, 7, Institutional Area, Lodi Road, New Delhi, India – 110003.

The basis on which the subsidiary is accounted for is disclosed in Note 2.7.

2.2 Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sale of goods in the ordinary course of the Company's activities. Revenue is presented, net of goods and services tax, rebates and discounts.

Revenue is recognised as follows:

(a) *Sale of goods*

Revenue from the sale of goods is recognised when products have been delivered in accordance with the shipment terms.

(b) *Interest income*

Interest income is recognised using the effective interest method.

2.3 Currency translation

These financial statements are presented in United States Dollar, which is the functional currency of the Company.

Transactions denominated in a currency other than United States Dollar ("foreign currency") are translated into United States Dollar using the exchange rates prevailing at the dates of the transactions. Currency translation differences resulting from the settlement of such transactions and from the translation at the closing rates at the balance sheet date of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

2.4 Bank balances

Trade and other receivables

Deposits

Bank balances, trade and other receivables and deposits are initially recognised at fair value and subsequently carried at amortised cost using the effective interest method, less any accumulated impairment losses.

The Company assesses at each balance sheet date whether there is objective evidence that these financial assets are impaired and recognises an allowance for impairment when such evidence exists. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy and default or significant delay in payments are objective evidence that these financial assets are impaired.

The carrying amount of these assets is reduced through the use of an impairment allowance account which is calculated as the difference between the carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

These assets are presented as current assets, except for those maturing later than 12 months after the balance sheet date which are presented as non-current assets.

2.5 Income taxes

Current income tax is recognised at the amount expected to be paid to or recovered from the tax authorities.

Deferred income tax is recognised for all temporary differences except when the deferred income tax arises from the initial recognition of an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of transaction.

Current and deferred income tax is measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date, and are recognised as income or expenses in profit or loss, except to the extent that the tax arises from a business combination or a transaction which is recognised directly in equity. Deferred tax arising from a business combination is adjusted against goodwill on acquisition.

2.6 Inventories

Inventories, comprise goods held for resale, are carried at the lower of cost and net realisable value. Cost is determined on a specific identification method. Net realisable value is the estimated selling price in the ordinary course of business less applicable variable selling expenses.

2.7 Investments in subsidiaries

Subsidiaries are entities in which the Company has power to govern the financial and operating policies so as to obtain benefits from its activities, generally accompanying a shareholding giving rise to a majority of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity.

Investments in subsidiaries are carried at cost less accumulated impairment losses in the Company's balance sheet. Where an indication of impairment exists, the carrying amount of the investment is assessed and written down immediately to its recoverable amount.

On disposal of an investment, the difference between net disposal proceeds and the carrying amount of the investment is taken to profit or loss.

2.8 Property, plant and equipment

Property, plant and equipment are recognised at cost less accumulated depreciation and accumulated impairment losses.

Subsequent expenditure relating to property, plant and equipment that has already been recognised is added to the carrying amount of the asset only when it is probable that future economic benefits associated with the item will flow to the Company and cost of the item can be measured reliably.

Depreciation on property, plant and equipment is calculated using the straight-line method to allocate depreciable amounts over their expected useful lives of 3 years.

The residual values, estimated useful lives and depreciation method of property, plant and equipment are reviewed, and adjusted as appropriate, at each balance sheet date. The effects of any revision are recognised in profit or loss when the changes arise.

On disposal of an item of property, plant and equipment, the difference between the net disposal proceeds and its carrying amount is taken to profit or loss.

2.9 Impairment of non-financial assets

Property, plant and equipment and investments in subsidiary are reviewed for impairment whenever there is any indication that these assets may be impaired.

If the recoverable amount of the asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. The difference between the carrying amount and recoverable amount is recognised as an impairment loss in profit or loss.

An impairment loss for an asset is reversed if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of accumulated depreciation) had no impairment loss been recognised for the asset in prior years. A reversal of impairment loss for an asset is recognised in profit or loss.

2.10 Trade and other payables

Trade and other payables are initially recognised at fair value, and subsequently measured at amortised cost, using the effective interest method.

2.11 Operating lease payments

Payments made under operating leases (net of any incentives received from the lessor) are recognised in profit or loss on a straight-line basis over the period of the lease.

2.12 Employee compensation

(a) Defined contribution plans

The Company's contributions to defined contribution plans are recognised as employee compensation expense when the contributions are due.

(b) Employee leave entitlement

Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the balance sheet date.

2.13 Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits with financial institutions and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

2.14 Borrowing costs

Borrowing costs are recognised in profit or loss using the effective interest method.

2.15 Fair value estimation of financial assets and liabilities

The fair values of current financial assets and liabilities carried at amortised cost approximate their carrying amounts.

2.16 Borrowings

Borrowings are initially recognised at their fair values (net of transaction costs) and subsequently carried at amortised cost. Any difference between the proceeds (net of transaction costs) and their redemption values is recognised in profit or loss over the period of the borrowings using the effective interest method.

2.17 Dividends

Dividends to the Company's shareholder are recognised when the dividends are approved for payment.
